

MEETING YOUR INFORMATION NEEDS

Business Intelligence

Data Governance

Information Management

Get your answer when you want it and how you want it.

Do you spend more time gathering data than analyzing it?

Do you have one click access to maintenance history for equipment seconds after an outage event?

Is the volume of data in the Smart Grid daunting? Ready for orders of magnitude more from Home Area Networks?

Is your data locked away in systems taking weeks just to get an extract to analyze?

Do you go to many systems just to answer one question?

Get your answer when you want it and how you want it.

Utilities are making huge investments in transmission and delivery infrastructure.

Information delivery infrastructure investment is vital to enable “self-service” information access.
